MOHAMED REDA QIYAOUI

Cybersecurity and Information Systems Audit Student

Tétouan, Morocco | +212 628622254 | mohamedreda.qiyaoui@etu.uae.ac.ma

PROFESSIONAL SUMMARY

Cybersecurity DUT student (EST Tétouan) with hands-on experience in threat and intrusion detection (NIDS/IDS/IPS, SIEM), penetration testing and Machine Learning. Active in CTFs and the CyberStorm club.

EDUCATION

DUT in Cybersecurity and IS Audit (CASI) | EST Tétouan - Abdelmalek Essaâdi University *2025 – 2027*

- Modules: Network Security (TCP/IP, IDS/IPS, firewalls, VPN), Cryptography, Windows Server, Python & C, SQL

Baccalaureate in Physical Sciences (French track) | Honours (Très Bien) *2024 – 2025*

ACADEMIC PROJECTS

NetScan - ML-Powered NIDS *July 2026*

- Designed a standalone NIDS (Network Intrusion Detection System) based on Isolation Forest (unsupervised ML)
- Detected stealth Nmap scans and SYN Flood / DDoS attacks without static signatures
- Built a SOC dashboard (Streamlit, Plotly) with GeoIP enrichment and firewall rules

Open-Source SOC Deployment: Wazuh, Suricata & pfSense *March 2026 – May 2026*

- Deployed a virtualized SOC (Security Operations Center) infrastructure (VMware)
- Simulated 10+ attacks from Kali Linux: Nmap, Hydra, SQLMap, hping3, ARP spoofing, Nikto
- Validated detection through Wazuh and Suricata, with pfSense filtering

Snort IDS/IPS Implementation *March 2026 – April 2026*

- Completed 3 labs: IDS deployment, custom rules, active blocking
- Wrote rules to detect ICMP/SYN scans and SSH brute force
- Configured inline IPS mode (NFQ) to block malicious traffic

CTF Challenges - Design and Contributions *2025 – 2026*

- Designed 2 original CTF challenges: SQL injection and reverse engineering
- Contributed to a Flask CTF platform deployed on Railway (Google OAuth)

CyberStorm - Cybersecurity Club Website *April 2026*

- Developed the club's official website (React, Vite, Tailwind)
- Built an admin interface with drag-and-drop

TECHNICAL SKILLS

SIEM / Detection	Wazuh (SIEM), Suricata (NIDS), Snort 3 (IDS/IPS)
Firewall / Network	pfSense, iptables
Penetration Testing	Nmap, Hydra, SQLMap, Nikto, Metasploit, hping3
Systems	Kali Linux, Ubuntu Server, Windows Server 2019
Programming	Python (OOP, scripting, Scikit-Learn, Scapy), C, SQL
Tools	GitHub, VMware, Cisco Packet Tracer, TShark, Streamlit

CERTIFICATIONS

- Getting Started with Cisco Packet Tracer | Cisco Networking Academy *May 2026*
- NDG Linux Unhatched | Cisco Networking Academy *April 2026*
- Introduction to Cybersecurity | Cisco Networking Academy *April 2026*
