

MOHAMED REDA QIYAOU

1st-year DUT Cybersecurity student | seeking an internship

ABOUT

1st-year DUT Cybersecurity & Audit student at EST Tétouan. Focused on threat detection, network defense and ethical hacking. Active CTF competitor. Seeking an initiation internship in 2026.

SKILLS

Cybersecurity	
Network Security	
Penetration Testing	
Programming	
Python	
C	
mySQL	
Tools	
Git / GitHub	
Virtualization	
Cisco Packet Tracer	
Operating Systems	
Linux / Kali Linux	
Windows Server	
Languages	
Arabic	Native
English	Advanced
French	Advanced

EDUCATION

Baccalauréat in Physical Sciences

- 2024/2025
- French option, with Highest Honors

DUT in Cybersecurity and Information Systems Audit

- October 2025 – Present
- École Supérieure de Technologie de Tétouan (ESTT)
- Network Security · Applied Cryptography · Windows Server Administration · IDS/IPS · Python & C Programming · Database Security · TCP/IP & OSI · Computer Architecture

CERTIFICATIONS

Getting Started with Cisco Packet Tracer

- Cisco Networking Academy
- Learned to simulate and configure network topologies using Cisco Packet Tracer. Covered fundamental networking concepts including routing, switching, and device configuration. Built hands-on skills in visualizing and troubleshooting network infrastructures.
- Credential ID:** d4d416ad-0662-42a4-844a-ba06a100ea49
- Skills:** Network Security · TCP/IP · Packet Analysis · Network Topology · Device Configuration

Introduction to Cybersecurity

- Cisco Networking Academy
- Gained foundational knowledge of cybersecurity threats, attack vectors, and defense strategies. Explored topics including malware, social engineering, network vulnerabilities, and data protection. Developed awareness of how organizations protect their digital assets and respond to incidents.
- Credential ID:** 5ec54f80-adb5-4d42-9ad8-3cdc94648e6e
- Skills:** Security Principles · Attack Vectors · Malware Awareness · Data Protection

NDG Linux Unhatched

- Cisco Networking Academy
- Acquired core Linux command-line skills including file system navigation, permissions, and process management. Learned essential shell commands used daily in cybersecurity and system administration roles. Built a practical foundation for working in Linux-based security environments like Kali and Ubuntu Server.
- Credential ID:** 253dc9e7-6545-4f6e-8149-0aaff7b2cf2c
- Skills:** System Navigation · Permissions Management · Process Management · Shell Scripting

COMPETITIONS

- ENSI 2K26 CTF (Cyberspace x ENSI) — 11 Flags solved (May 2026)
- NorthSec 2026 — 6 Flags solved (April 2026)
- Morocco-Spain Cybersecurity Forum AI CTF 2026 — 5 Flags solved (Team ANARCHOTECH) (May 2026)

PROJECTS

SNORT IDS/IPS

- Completed 3 progressive labs covering Snort 3 installation, custom rule writing, and active IPS deployment.
- Wrote 8 custom rules targeting ICMP floods, SSH brute force, Nmap scans, Telnet, and HTTP SQL injection.
- Simulated 6 real attack scenarios and validated detection in real time via alert logs and Wireshark.

 **Skills:** IDS/IPS · Intrusion Detection · Rule-based Detection

Portfolio Website

Personal cybersecurity portfolio featuring a project showcase, academic timeline, and an Impossible List, all available in English, French, and Spanish. Built with a futuristic aesthetic. Live at: mohamedreda.is-a.dev

Web CV

A trilingual web CV (EN/FR/ES) built with Hugo, designed to present my cybersecurity profile in a clean and structured format. Features skills ratings, project listings, certifications, and full contact information. Each language version is independently accessible and fully printable as a PDF, making it easy to share with recruiters across different regions. Available at: www.mohamedreda.is-a.dev/CV

CTF Labs & Hidden Flags

- Designed 2 custom CTF challenges covering web exploitation and reverse engineering.
- Ongoing project with more challenges in development.

Attack Simulation — Wazuh, pfSense & Suricata

- Deployed a full open-source SOC integrating Wazuh SIEM, Suricata NIDS, and pfSense firewall.
- Simulated 7 attack categories (reconnaissance, brute force, SQLi, reverse shell, privilege escalation, ARP poisoning, DoS) using 12+ tools.
- Validated detection via Wazuh Level 9–10 alerts, Suricata signatures, and FIM integrity module.

 **Skills:** SIEM · Wazuh · Suricata · NIDS · Threat Detection · Vulnerability Assessment · Nmap

... and many other small projects
